- YAWNING II I
  
- GENERAL:
- <LHS

- Neck, i.e., the cervical joints, feel as if slightly “greased,” (the way moving parts in a machine are greased). This enables my head to turn left and right with greater ease – ease of rotation
- Ovarian cancer, cell division/mitosis
  - <LHS, <exertion
  - Sensation brings you to seeing and feeling with your body, which brings unbelievable love. Total contentment and no need for food.
  - Preverbal expression: drawing, dance, hand signs, pictures, feelings, intuition, shamanic state
  - Dancing, fertility, movement of sperm
  - LOVE: Feeling of guilt about the quality of love given and unconditional love you failed to give; Realization that love given was inadequate, this brings grief; remedy teaches you what love is, problem is with the quality of love;
  - PROTECTION: Feeling protected, held, warm and safe, no one can see me. Establishing protective boundaries; protected but then lose the connection; Easy to be inside, also easy to be out. Feels like floating in “fruitwater” – nurturing water; don’t want to leave the water because the food will be dirty; feels like floating in a warm sea, insulated. Want to go back to my mother.
  - DEATH AND REBIRTH: Reconciliation of death; death and rebirth; Thoughts of suicide because of lack of connection and love. Coming through a gateway. Questioning our existence: who makes this, where does it come from.
  - CHAOS: chaotic thoughts, scattered thoughts; going from chaos into patterns and from patterns into chaos; from chaos into perfection and completeness. Joining a portion with the whole, making it one, thereby changing the whole, it is ONE. Together we are one. Mind scatters, mind drifts. Mind is confused when judging emotions. Feeling criticized, judged and judging followed by acceptance. Alternating states of being; being one and being different. Surreal feelings.
  - CHILDREN: Impatience from want of children, then calmness and acceptance. Thoughts about stolen children, and grief about it.
  - Sees colours, dark, green, yellow and pink; it’s dark and light together; sees only lights and colours
  - SPIRITUAL INSIGHTS:
  - WATER: Healing is from the water, and will keep us healthy (baptism). Everything is from God; all is God. We can all heal from this “fruitwater” = nurturing water (it can never contain any cancer cells).
  - REBIRTH/REINCARNATION: Connect with eternal life; review whole history; recapitulation. Strong and complete feeling. Interconnectivity of human beings is beyond time; feeling of infinity. Reincarnation – have travelled this path many times before, every time with a different goal. Reactivation of your potentiality to the degree that you are aware. I’ve gone through all the layers of the life cycle. The embryo is a totality in itself like the whole universe.
  - LOVE: Insight into the true nature of love; unconditional and in dissolvable; first emptiness, then making space for love. Image of a heart cracked through the middle with a bright light shining through. Broken heart heals and this leads to a bigger love. Love sustains the experience of living. Love, connection, contact, friendship. Looking for oneness and harmony; it becomes a good orchestra.
  - RELATIONSHIPS: Gives an overview about your relationships from young onwards; insight into your whole history of relationships, complete with connections and disconnections. Gives you insight where you had problems; brings back information and memory from the past. Forgiveness: feels she can forgive everybody, everybody is forgiven. I can bring up the child, feed it and educate it.
  - DEATH: Death is the flow of life. Emptiness is the fullness. You cannot fill if you are not empty. The river of the life needs death. Sacrifice of the twin in utero
  - PRIMEVAL INSIGHTS: our understanding of life is informed by signs and symbols that reveal themselves in their own time; no words to describe the layers. Perceiving visually without opening or using my eyes.
  - SPIRITUAL CRISIS: realization that you didn’t take the right path; references to suicide, spiritual death and rebirth. Going through the layers of losses, darkness, grief and happiness. Then like being reborn. Ambivalence about existence.
  - Restorative: this is a restorative substance. It allows the resetting of the organism, like rebooting the computer. One’s potentiality is rekindled. Possibilities are accessible. This substance renews the soul’s infusion into the physical body realm.
  - i understood the world and myself. all we want is to be loved
  -
